

SHORT COMMUNICATION

A new combination in *Austrodanthonia* (Gramineae)

S.W.L. Jacobs

Linder and Verboom (1996) and Linder (1997) reorganised the Australian species formerly included in *Danthonia*. Most of the species were eventually transferred to a new genus *Austrodanthonia* H.P. Linder. During this process it appears that one species (*Danthonia procera*) was omitted. This omission is dealt with here in preparation for a forthcoming new edition of Wheeler *et al.* (1990).

***Austrodanthonia procera* (Vickery) S.W.L. Jacobs comb. nov.**

Basionym: *Danthonia procera* Vickery (1956: 306)

Synonyms: *Notodanthonia procera* (Vickery) Veldkamp (1980: 297); *Rytidosperma procerum* (Vickery) Connor and Edgar (1979: 332).

Holotype: Tasmania: Risdon, J. Vickery, 18 Jan 1949 (NSW11254).
